DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1-5 and 8 have been considered but are moot in view of the new ground(s) of rejection.

PRIOR ART REJECTIONS

Statutory Basis

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

The Rejections

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Masleid et al. (U.S. 7,049,699).

Masleid discloses a low RC structure with

(1) specifying a tile (500) comprising first layer wherein said first layer comprises a first layer element for a deep N-well pattern;
arranging multiple instances of said tile to an array covering a portion of said integrated circuit design;

merging said tiles to produce a deep N-well pattern (see Figure 5A).

FIG. 5A

Allowable Subject Matter

Claims 2-5 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
